# Mini steel tube PLC Splitter

The PLC splitter is an optical power distribution device based on the integrated waveguide of quartz plate. It has the characteristics of small size, wide working wavelength range, stable reliability and good uniformity. It is widely used in PON, ODN, and FTTX points to connect between terminal equipment and central office to achieve a signal splitter.

Nitrotel's Mini steel tube PLC Splitter family has 1x2, 1x4, 1x8, 1x16, 1x32, 2x2, 2x4, 2x8, 2x16 and 2x32, which are tailored to different applications and markets. It has compact size with wide bandwidth. All products meets ROHS, GR-1209-CORE-2001 and GR-1221-CORE-1999.
